PERSONAL STATEMENT

I am a polite, respectful, hard working and ambitious programmer and retoucher from London who at first is a tad shy but soon settles into new roles. I have worked as a retoucher for the bulk of my working career but have been programming since the early days of my secondary school years.

I am very interested in technology and like to understand the fundamentals to how things work and why they work. I feel because of my coding knowledge I can solve problems easily helping me to narrow down potential flaws and problems within workflows and client briefs.

I have very strong mac operating skills and can learn new software quickly. I work well under pressure, as well as collaboratively or independently.

Writing HTML, CSS, and Wordpress is no problem for me. I am also reasonable at PHP & JavaScript but I do rely on Google and the help of other coders when writing platforms in these languages.

EDUCATION

Welling School 2004 - 2008

GCSE Media Studies **B**
GCSE Graphic Design **B**
GCSE Photography **B**
GCSE Electronics **C**
GCSE Maths **C**
GCSE English **B**
GCSE Science **C**

HOBBIES & INTERESTS

I have been retouching and programming since the early years of secondary school both in my personal time and work time. I have a selection of my own websites from a blog to a horse racing tipping site. I enjoy anything technical and thrive to understand how things work. I love gaming and getting out on my bike for a few hours on the weekends.
